### INVERTER FEATURES

#### Extended Surge Rating

- Surges to 2X continuous power for 5 seconds for motor loads

#### True Sine Wave AC Power

- For operation of sensitive and motor loads

#### Ignition Control

- Feature to turn inverter on/off via a 12 VDC signal and to minimize battery drain by switching the inverter off when the ignition key is turned off

#### Wide 20-32 VDC Input Range

- Ensures inverter operation on high voltage alternators found on many new vehicle chassis

#### Programmable AC Under-Voltage (85-110VAC) Shutdown

- Feature ideal to operate under weak shore power or generator input

#### Built in 30A AC Transfer Relay

- Senses when outside AC Power is present and transfers the load from the inverter to the source of incoming power

### BUILT-IN CHARGER FEATURES

#### Power Factor Corrected Multi-Stage Charging

- Utilizes less shorepower when charging batteries. This frees up more usable AC power for running electrical devices and appliances and reduces the likelihood of tripping shorepower breakers

#### Programmable

- Configurable 3 stage temperature compensated battery charge algorithm for optimal charging of almost any battery type up to 24V

#### Battery Equalization

- Maximizes flooded battery life

#### Dead Battery Charging Down to 0 Vdc

#### Power Share

- Prioritizes AC loads by reducing the charge current and maintaining the total input current to less than the breaker setting

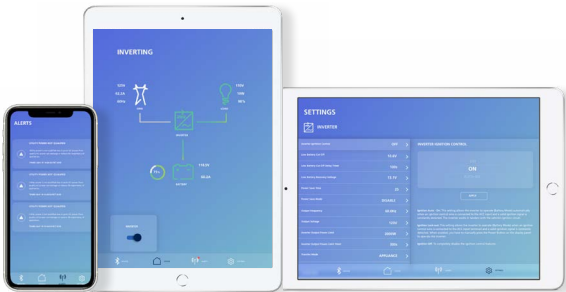

#### Lithium Ion Battery Charging

- Pre-set Lithium Iron Phosphate (LFP) battery profile available or configurable to charge virtually any lithium ion chemistry battery (BMS required)
